

# Amiga keyboard hard PCB membrane replacement

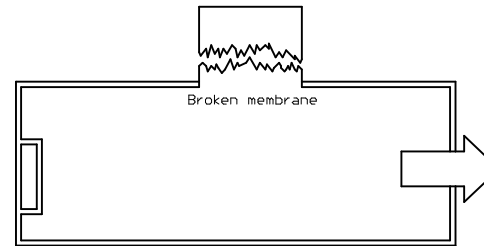

Thank you for purchasing my PCB.  
I hope that the product will meet your expectations and  
your keyboard will gain a new, better life :)

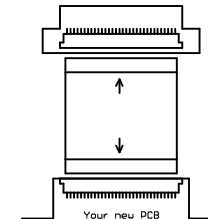

1. Oh no! My keyboard is broken!

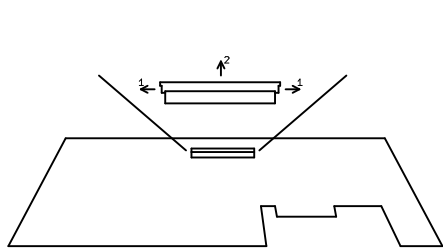

2. Unscrew all screws and open the metal cover.

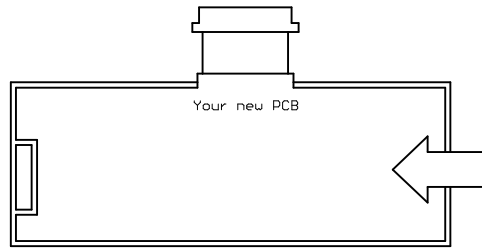

3. Remove old membrane.

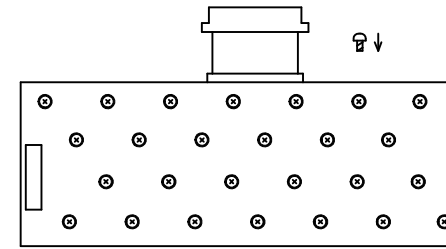

4. Connect the FFC cable to the connectors.  
Blue rectangles must be on the right direction.

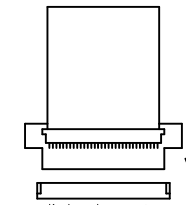

5. Remove the plastic latch from the keyboard socket.

6. Install your new PCB membrane into the Amiga keyboard.

7. Close the metal cover and tighten the screws.

8. Plug in the small PCB to the  
keyboard socket.

9. HAVE FUN!!!
